

# COLLARD

# LEAF REMOVERS

## EFFECTIVE SYSTEM FOR REMOVING LEAVES AROUND THE FRUIT ZONE

Effective leaf removing to aid in ripening, color intensity and removing any impurities. The leaf removal is achieved by our "patented" double flow low pressure air produced by the 3 point PTO driven air compressor. The Collard system blows through the leaves at fruit level by rotating nozzles that removes the leaves from both the outside and interior of the row, achieving selective leaf removal around the apples without damage.
