

GRADING SCRAPERS COMPACT SERIES

GREAT IMPLEMENT FOR ROAD MAINTENANCE

The new **Gearmore Grading Scrapers** were designed to perform many different tasks, such as: landscaping, road repair, arena maintenance, etc. Many unique features enable the operator to do a number of different tasks, no matter what the soil conditions.

General Landscaping - The deep ripping scarifier shanks will break-up the hardest of soils. Dual cutting blades will allow for the movement of large amounts of material when required. To finish grade, set the shanks upside down in the storage position and lightly grade to finish your landscaping project.

Repairing Roads - The dual blade flow through action cuts out high spots, fills holes and moves material from the outer edge of the road toward the center, thus achieving a smooth finished road.

Arena Maintenance - Set the shanks at the maximum depth and lower the dual cutting edges to the maximum depth. This operation will move the material away from fences, and loosen, aerate, and smooth out the surface.
