

LABOR SAVING IMPLEMENTS

FOR HORSE RANCHES

MAKE YOUR TRACTOR MORE PRODUCTIVE

This brochure is to aid you in selecting tools to make your ranch a more productive and attractive property for you and your horses. We cover implements for 8 different maintenance areas, which we feel will be of interest to you - arenas, fencing, manure disposal, weed control, pastures, roads, and material handling.

BUILDING PASTURES

Rotary Tillers

Our *C Series*

line of tillers are very popular as they are available in 6 different widths, from 34" to 72". We suggest if the tractor has enough horsepower available, order a tiller wide enough to cover your tractor rear tire width. Our tillers are ideal for preparing seed beds, as they loosen the soil and mulch in residue that is on the ground.

Tandem Discs

Our *DH Series*

of tandem discs are an economical way for tilling pastures. The discs have two rows of blades; cutting notched blades on the front gang and finishing smooth blades on the rear gang. The discs are available with 18" diameter blades, with widths of 60", 72" and 84". These discs will level and mix the soil. Any of your arena tools (see arena maintenance) can then finish the soil for seeding.

ARENA MAINTENANCE

Rotary Harrow

The GRH Series of **Rotary Harrows** was designed to aerate soil and pull weeds. The unique turning action allows the harrow to level soil by redistributing it inward. Excellent tool for moving high spots away from fences and walls. Levels, floats and breaks up clods. The ideal product to use in arenas.

Drag Chain Harrow

This is a low cost popular way to finish groom an arena. These harrows smooth rough spots, fill in holes and incorporate moisture. The popular sizes are 4, 5, 6, and 8 foot widths. If you plan to keep your harrow close to the arena, this is an acceptable tool.

Liftable Chain Harrow

If you plan to store your chain harrow at a distance from the arena, this liftable harrow might better fit your requirements. These liftable harrows are available in 6 & 8 foot widths. Both harrows have aggressive action, light action, and minimum action depending on how you attach the chain to the drawbar.

Arena Vator III

The **Arena-Vator III** is a highly versatile tool designed for a variety of arena surfaces. The AV-3 is designed to renovate and condition horse arenas and tracks in a single pass. It produces a firm, yet giving surface that provides the securest footing for your horses. Available in 4', 5', 6', 7', & 8' sizes. The standard unit is equipped with two rows of S-tine shanks with reversible points which loosen and cultivate the soil, an adjustable pipe leveler for leveling the soil, and a 12" diameter spiral rod rear roller to gauge the depth and pack the soil to provide a uniform finish.

IMPLEMENTS

SEEDING PASTURES

PTO Drive Seeder/Spreader

When you have a tractor available, the most economical seeder / spreader is our **Model PL180**. The seamless conical steel hopper has a capacity of 480 pounds. The unit has adjustable uniform rates from 20 to 900 pounds per acre and effective spreading widths of 20 to 45 feet.

Seeder/Spreader

Our **Model PTP180-P** Seeder / Spreader is the ideal implement for use if your ranch vehicle does not have a 3-point hitch and power take off. This unit has a ground driven gearbox that can be disengaged when transporting. This is a very handy implement for both seeding and fertilizing pastures. Same capacity as 3-pt. unit.

PASTURE MAINTENANCE

Compact Rotary Mower

Our **Model L-48-40-XB** Rotary Mower was developed for tractors 15 to 20 horsepower. Stability is very important for small tractors, especially in mowing rough terrain. Two rubber gauge wheels keep the mower level, and takes stress off the tractor by giving the mower a more stable footprint. This mower has an overall width of 51 inches.

Flail Mowers

This Gearmore **SLE Series** mower was developed for mowing grass and light weeds with side slicing Y blades. All models are also available with finish mowing cupped "ducksfoot" blades for mowing grass. Standard features include ASAE quick attach 3-point hitch, low profile design, center mount or offset, adjustable rear roller and many more. These flail mowers were designed to achieve fine shredding on cover crops, parks, golf courses, pastures, and light weed abatement.

IMPLEMENTS

MANURE HANDLING

Manure Spreaders

The Conestoga Manure Spreaders are available in 6 different sizes from 20 to 115 cubic feet capacity. Spreaders are available in ground wheel drive or PTO driven. Units feature "10 Year" Warranty on spreader box and "Lifetime" on the poly floor and apron chain. These spreaders have the best warranty in the industry.

BUILDING FENCES

Diggers

The *Worksaver Post Hole Diggers* are engineered to allow the operator to dig deeper, faster and smarter. Worksaver's line of PTO powered diggers offer time saving convenience with outstanding reliability. Shear bolt protected driveline is coupled to a rugged gearbox featuring tapered roller bearings and spring loaded seals for extended service life. Large 2" output shaft has two bolt auger connection for reliable power transfer. All job matched augers utilize fishtail center points with double flighting on the first.

ROAD MAINTENANCE

Drag Scraper

The *CD5, 6 & 7* foot drag scrapers are a great road maintenance tool. Also good for building arenas, it perfectly grades and levels base material and sand. The scrapers are hydraulically controlled from the seat of your tractor. The flotation gauge wheels allow you to set the cutting edge to build and maintain roads using the same concept that is used in building highways today.

WEED CONTROL

Skid Sprayer

Our *Model UTL-40-5* sprayer with 40 gallon poly tank will handle most spraying projects around the ranch. The simple electric pump is powered by the battery on your towing vehicle. This diaphragm pump was designed to handle herbicides. Standard equipment includes handgun with 25 feet of hose and boom with 100" coverage.
