

# SPEDO VINEYARD FINGER HOE

**THE ULTIMATE TOOL FOR QUICK AND EFFECTIVE WEED CONTROL**

The unique Finger Hoe operates around and between the vines without damaging the trunks. This allows the removal of weeds in areas that no other tool can reach. The weeding system has a 3 disc gang Spider Wheel to break up the soil and weeds, then the Finger Hoe tills and weeds in row line.

The first pass of the year it may be necessary to loosen the ground with a Power Disc or Blade. The Finger Hoe will then be able to control the weeds until harvest. Also, in comparison to the traditional blade, you will find the Finger Hoe is much faster and avoids the formation of clods. This unit was developed for one side weeding, so it can be operated at speeds up to 10 MPH with safe and accurate control.
